

# How to play: TRASH

## The Card Game

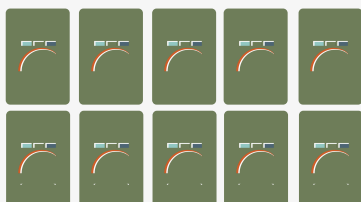

### Materials:

- One Deck of Cards for every Two Players

### Set Up:

1. Shuffle the deck and deal out ten cards face down for each player.

Example:

### Goal:

The goal of the game is turn all your face down cards up by collecting A-10

2. Place the remaining deck in the center to form a stock pile.

### Gameplay:

1. The first player draws a card from the stock pile.
  - a. If the card is a King or Queen it is immediately discarded as "Trash" and that player's turn is over.
  - b. If the card is a number (A-10) the player may remove the face down card in the designated position and replace it with the new card. (See layout.)
  - c. If the card is a Jack the player may replace ANY face down card as Jacks are WILD.
2. The removed card, in turn, may be placed in its designated spot if the position is available and so on until a card cannot be played.
  - a. Duplicate cards become TRASH
  - b. In the event that a numbered card is drawn but a Jack is already in its designated position, the Jack may be displaced and used again in place of any face down card.
3. The next player can choose to draw from the stock pile or pick up the top card from the discard pile.
4. When a player has turned all ten cards face up, they WIN!

\*\* Note: The 10 cards **do not** need to be of the same suit.
